

Workshop n°3
Maritime safety and green transport
Femern Island, 5 June 2013

**Rewards for sustainable practices in
recreational boating in the Strait of Bonifacio**

Province of Sassari
National Parc of the Archipelago de La Maddalena,
Office d'environnement de la Corse (OEC)

About the practice

Environmental rewards to boats with specific requirements of eco-compatibility

- A **40% discount** in the authorization fee for **sailing boats**
- **boats fitted with sewage holding tanks may continue mooring** after sunset in Mb zones
- **small rowing boats can navigate closer to the coast line** in Mb zones (excepts periods of bird nesting colonies)

What have been done?

Since 2007 the Park Authority of La Maddalena introduced **environmental rewards**

2012 → **Institution of EGTC**

(European Group of Territorial Cooperation)
to support a program of harmonization
of management actions in the Strait

How to enhance the practice value?

Measures integration with other policies and practices implemented

Working more on monitoring and control

- collecting and sharing informations and data
- stronger coordination between Bodies involved in the management of the Strait

Further actions

EGCT projects

promotional events of “environmental rewards” to eco boats

awareness campaigns to promote more environmental respectful behaviors and attitudes
